**Application for Data and Biomaterial Samples of the Covid-19 Aachen Study (COVAS)**  
**(If you need Biomaterial besides Data please fill in Page 2 as well)**

<b>Project Description:</b>
<b>Research Question (max 100 words):</b> <i>Description of the research question and clinical background / knowledge gap that should be addressed</i>
<b>Analysis:</b> <i>Brief description of the experimental analysis and methods to be used</i>
<b>Expected Results/ Data generated:</b> <i>Describe which data will be generated by the method (eg. whole exome sequencing, please also describe which data will be made available for others) and what hypothesis will be answered by this analysis.</i>
<b>Financing:</b> <i>How is the financing of the analyses planned, are the financial resources available?</i>
<b>Duration:</b> <i>Time for validation of the method, sample preparation, data analysis, results compilation, writing of the publication</i>
<b>Participating Centers:</b>
<b>Summary (max 250 words):</b> <i>Background, Methods, expected Results, Conclusion</i>

For the benefit of future patients, the results of the analyses in biomaterial of the Covid-19 patients should be published timely, and preferably open access. The clinicians and co-workers who treated the patients as well as collected and saved the biomaterial are also scientists by profession, therefore, in a worksharing environment they are scientifically contributing authors on any publication based on COVAS.
